

AIT Medihelp

"medicines training you can trust"

Who we are

Established in 2009, our aim has always been to make a difference. We are not about providing services that just "tick a box" We're always about empowering individuals and working with you to develop necessary skills to grow confident and competent staff.

Our experienced team of pharmacists are here to support you all the way - whether that be through our accredited training or our medication audits.

AIT is with you every step of the way

Can we help you?

Are you an organisation or individual who has responsibility for **administering medication**?
Are you confident you are meeting the required regulatory standards for the safe management of medicines?

Then we can help!

After fully establishing your needs we can guarantee to deliver professional, friendly and 5 star service to you. Whether it be with our pharmacist designed and accredited training courses, or our comprehensive medicines management audits with one of our experienced pharmacists.

You can relax knowing **you've got AIT on your team.**

*Always accredited
Always supportive
Always 5 star*

Care Quality Commission (CQC) fundamental standards of care

Employers must ensure staff have the qualifications, competency, skills & experience to keep their clients safe. There should be effective governance with relevant checking systems in place for quality & safety.

Staff must be given the support, training & supervision they need to enable them to do their job. They should prevent avoidable harm or risk to health, safety & welfare.

Clients must have care or treatment that is tailored to, & meets, their individual needs & preferences. They should always be treated with dignity & respect.

Everybody has the right to receive safe, high quality care.
